PROFILE

As a dedicated and skilled **Full Stack** developer, I am deeply passionate about creating exceptional user experiences on **web and mobile** applications. With a solid background and a total of **9 years** of professional experience, I can bring a wealth of expertise to the table. I have a track record of building **successful projects** and have received excellent feedback from customers.

I am a proficient **problem solver**, **dedicated and responsible developer**, **passionate learner**, and a **good team player**. I possess strong **work ethics**, **organizational** and **time management skills**, and I am known for my **accuracy** and **trustworthy work style**.

I always strive to dedicate myself and contribute to the advancement of the creative and innovative world.

SKILLS

Languages (JavaScript, TypeScript, HTML, CSS, Java, Python, PHP, C/C#, GoLang, Ruby, Solidity, Rust, SQL)

Frameworks / Libraries (React / Redux, Vue.js, Angular, Next.js, Node.js, Nest.js, Express, Tailwindcss / MUI / Bootstrap, Django, React Native, Laravel, WordPress, Magento, Hardhat, Truffle, Chainlink)

Services / API / Tools (AWS, GCP, REST API, GraphQL, Git & Github, Docker, CI/CD Pipelines, Azure, Jira)

Database (MySQL, MongoDB, PostgreSQL, NoSQL, Firebase, SQLite)

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer, *SoftwareMill*

May 2021 – Jul 2023

- I have extensive experience with MERN and MEVN stacks, developing dynamic web applications.
- I have built real-time chat applications using React and Node.js, and utilized Python's Django framework for creating e-commerce platforms with features like user authentication and order processing.
- I have also implemented machine learning algorithms using Python's TensorFlow and PyTorch libraries to develop recommendation systems.
- In addition, I have experience with Java technologies such as Spring Boot and Hibernate, developing RESTful APIs and simplifying database operations.
- I have implemented DevOps practices using Docker and Kubernetes for deployment and scalability.
- I have integrated automated testing frameworks like Jest and Selenium, and utilized cloud services such as AWS Lambda, S3, EC2, and RDS for creating scalable infrastructure.
- Overall, my diverse skill set in MERN and MEVN stacks, along with experience in Python and Java technologies, allows me to develop robust web and mobile applications using the best tools and frameworks for each project.

Full Stack Web and Mobile Developer, *DevelopX*

Jun 2018 – Apr 2021

- Experienced full stack and web mobile app developer proficient in HTML, CSS, JavaScript, React, Angular and React Native, Flutter, Swift, Kotlin etc. Successfully delivered responsive websites and mobile applications.
- Skilled in building RESTful APIs, ensuring seamless server-client communication for dynamic web and mobile app experiences.

EDUCATION

Bachelor's Degree in Computer Engineering,
Nagoya University
2009 – 2013

- Software Engineering
- Computer Information Technology
- Computer Networks
- Data Structures and Algorithms

CERTIFICATES

Certified Web Developer (CWD)

@ Issued by Free Code Camp

Recognizes proficiency in web development technologies, including HTML, CSS, JavaScript, and frameworks like React or Angular.

Mobile App Development Certification

@ Issued by Udacity

Validates skills in developing mobile applications for iOS or Android platforms using languages like Swift or Java.

Full Stack Developer Certification

@ Issued by International Association of Accessibility Professionals (IAAP)

Demonstrates expertise in both front-end and back-end web development, including HTML, CSS, JavaScript, databases, and server-side programming languages like Python or Ruby.

Certified Agile Software Developer (CASD)

@ Issued by Free Code Camp

Validates understanding and application of Agile software development principles and practices, including working effectively in Agile teams and using methodologies like Scrum or Kanban.

LANGUAGES

English | German | Japanese

INTERESTS

Swimming | Climbing | Football

- Collaborative team player, working closely with designers and project managers to deliver high-quality products within tight deadlines.
- Proficient in database management using MySQL and MongoDB, ensuring efficient data storage and retrieval.
- Strong understanding of Git for effective collaboration and code management in team environments.
- Promoting effective teamwork and project development, with a strong emphasis on Agile methodologies and utilizing the widely adopted Jira platform.

Full Stack JavaScript Developer, NRI

Feb 2015 – Mar 2018

- I have designed and implemented end-to-end web applications using MERN/MEVN stack (JavaScript / TypeScript, MongoDB, Express, React, Node.js), as well as Java and PHP.
- I collaborated with cross-functional teams to gather requirements, plan project timelines, and deliver high-quality software solutions.
- I integrated databases like MongoDB and MySQL, implemented responsive interfaces using HTML, CSS, and libraries like Bootstrap and Material-UI.
- I also utilized Git for version control, conducted code reviews, implemented automated testing by using Docker, and employed continuous integration with Jenkins for seamless development and deployment.
- Overall, my experience has provided me with a comprehensive understanding of web development principles and the ability to deliver scalable applications that meet client requirements.

Junior JavaScript Developer, Ikayzo

Nov 2013 – Dec 2014

- I have gained hands-on experience in front-end development, collaborating with senior developers to build and maintain web applications.
- I wrote clean and efficient code, following best practices and coding standards.
- My projects included building responsive web pages, integrating APIs, and enhancing user experience through interactive features.
- I also worked with Git for version control and actively participated in code reviews and debugging sessions.
- Overall, my experience has provided me with a strong foundation in web development and a passion for continuous learning.
